

Crossbar

An outstanding **selective broad-leaved herbicide** for managed amenity turf and amenity grassland

WHY CROSSBAR

- › Controls many difficult-to-kill turf weeds including Slender Speedwell and Yellow Suckling Clover
- › Contains three powerful active ingredients giving broad spectrum activity
- › Can be applied on newly sown turf 2 months after sowing
- › Excellent grass safety

How Crossbar works

Crossbar contains three powerful active ingredients. Fluroxypyr belongs to the pyridine carboxylic acids group of chemicals and is active at very low dose rates and readily translocated through the target weeds. Dicamba and 2,4-D also work by interrupting plant hormone activity in susceptible weed species.

New turf may be treated in the spring provided that at least two months have elapsed between sowing and treatment.
