

Nutri-Link

Plant health solutions

The system that provides a synergistic approach to turf nutrition and plant health. Comprises of several formulations designed to supplement granular nutritional programmes, or used as a stand-alone nutrient input package. Nutri-Link assists the plant in maintaining and enhancing plant health and withstand both biotic and abiotic stresses on all turf surfaces.

WHY NUTRI-LINK

- › Enhanced root mass and depth
- › Increased tillering and denser sward
- › Improved disease tolerance
- › Improved cell wall structure
- › Rapid recovery from wear and mechanical damage
- › Enhanced colour
- › Improved germination and establishment
- › Reduced salt toxicity
- › Enhanced Carbon sequestration
- › Compatible with Maintain NT (Kopis compatible with Nutri-Link Green)

12-0-0 +1Fe +6CaO +seaweed

Nutri-Link Base

Unique formulation that enhances turf metabolic functions. Oligosaccharides ensure that Carbon and Nitrogen assimilation and cell wall formation are increased improving defence against pathogens and growth. Dew formation is reduced in the first 24 hours. Compatible with other Nutri-Link products.

Pack Size: 20lt, 200lt, 800lt

Application Rate: 10-40lt/ha

Water Volume: Minimum 400lt/ha (500lt when mixed with one or two other products)

Input (kg/ha): N: 1.56-6.24

Total N: 12

N Sources: Ammoniacal 1.0 Ureic 8.0 Nitric 3.0

Suggested Use Period: All year

10-2-7+Te

Nutri-Link Leaf

A balanced NPK formulation with essential trace elements, which provides a complete nutritional package. Contains enzyme activators that assist in the production of essential growth hormones, promoting leaf strength and sward density. Compatible with other Nutri-Link products.

Pack Size: 20lt, 200lt, 800lt

Application Rate: 10-50lt/ha

Water Volume: Minimum 400lt/ha (500lt when mixed with one or two other products)

Input (kg/ha): N: 1.20-6.00 P: 0.24-1.20 K: 0.84-4.20

Total N: 10

N Sources: Ureic 10.0

Suggested Use Period: Mar-Oct

3-0-0 +2Fe +22% Seaweed +Amino-Acids

Nutri-Link Revive

A stress busting formulation containing *ascophyllum nodosum* and L-form amino acids which improves plant recovery and stimulates beneficial microbial activity. L-form amino acids improve nutrient absorption and abiotic stress resistance. A small amount of Nitrogen provides a quick perk-up. Compatible with other Nutri-Link products.

Pack Size: 10lt, 20lt, 200lt

Application Rate: 5-20lt/ha

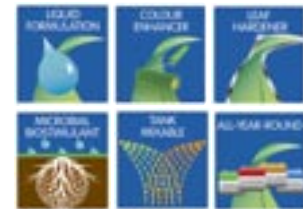

Water Volume: Minimum 400lt/ha (500lt when mixed with one or two other products)

Input (kg/ha): N: 0.18-0.73

Total N: 3.0

N Sources: Ureic 3.0

Suggested Use Period: All year

5-0-0 +5Fe +carbohydrates

Nutri-Link Green

Formulated to give excellent presentation, and ensure nutrients and sugars are absorbed quickly through the leaf. Nutrients within the rootzone are more readily absorbed. Contains molasses to improve microbial stimulation. Aids disease resistance. Compatible with other Nutri-Link products.

Pack Size: 10lt, 20lt, 200lt

Application Rate: 5-20lt/ha

Water Volume: Minimum 400lt/ha (500lt when mixed with one or two other products)

Input (kg/ha): N: 0.30-1.18

Total N: 5.0

N Sources: Ureic 5.0

Suggested Use Period: All year

Humic Acid & Fulvic Acid

Nutri-Link Root

A formulation using complex organic polymers, designed to improve the formation and development of root systems. Improves nutrient and moisture availability, and the physical, chemical and biological characteristics of the rootzone. Carbon sequestration is enhanced. Compatible with other Nutri-Link products.

Pack Size: 10lt, 20lt, 200lt

Application Rate: 5-20lt/ha

Water Volume: Minimum 400lt/ha (500lt when mixed with one or two other products)

Suggested Use Period: Feb-Nov

0-0-7 +10% Silicon

Nutri-Link Stand

A Potassium and Silicon formulation, that provides a more resilient sward by strengthening cell walls and stabilizing lignin formation. Silicon is transported to epidermal cells within the leaf and stem leading to a more erect blade producing a cleaner cut and more uniform light distribution over the sward. NOT compatible with other Nutri-Link products.

Pack Size: 10lt, 20lt

Application Rate: 5-10lt/ha

Water Volume: Minimum 400lt/ha

Suggested Use Period: Feb-Nov
