

Cobra Nova

Creeping bent

Cobra Nova is a new generation cultivar with advanced turf qualities. The darkest genetic green colour for creeping bent in Turfgrass Seed 2023, it has early spring green-up and increased disease tolerance, rapid establishment and close mowing tolerance down to 2.5mm.

Cultivar

100% Cobra Nova: Creeping bent

Increased disease tolerance and lower inputs

Turfgrass Seed 2023	Shoot density	Visual merit	Winter green	Summer green
Cobra Nova	6.3	6.3	7.4	5.9

Sowing rate	Overseeding rate	Sowing depth	Mowing height
8g/m ²	4g/m ²	Rootzone contact	Down to 2.5mm

High Shoot Density

Year-round Colour

Disease Tolerant

Close Mow Tolerant

Usage

- Golf greens

Performance

- Cool weather colour retention helps eliminate the appearance of winter stress
- Early spring greenup
- Higher tolerance to a range of turf grass diseases including *Microdochium* and Brown Patch (*Rhizoctonia*)
- High seedling vigour and fast establishment
- Excellent turf quality, fine leaf texture
- High density and rapid tillering helps out-compete *Poa annua* ingressions
- Tolerant of very close mowing down to 2.5mm
- High salt tolerance

Pack Size: 11.34kg
